

## Speed Indicator Display (SID) Data Summary for January 2025 Meeting

During December 2024 the two signs remained in the same positions as in November. Unfortunately, both signs have had some technical issues. The sign outside St Marks failed to collect data for a two-week period - the problem now appears to have been resolved, but the data summarised below is thus for only half of December. The sign by Wilderness Wood was rotated at the end of December and the batteries changed but failed to reboot. A SWARCO Engineer is due to visit on 13<sup>th</sup> January and hopefully the problem will be resolved. The data once again shows the lack of respect for the 30 mph Hadlow Down's speed limit by very many drivers!
